Blockchain
Secure

- Encrypted Account (currency)
- Difficult to port
- decentralized trust system
- No corruption (consensus)
- Identity

Attack

- 51%
- steal account
- steal computer

Ethereum
Secure

- PoW
- PoS (coming soon?)
- ~~~~~~
- Fuel to use contracts
- Low transaction time
- Private chains
- Contracts Community

Eigen Trust

- Trust trusted peers
- Trust of peers
- trust based on real/fake transactions
-

Over Clouds
List

- Storage
- Gateway (bootstraping)
- Contracts OC
- Po Participation (commu)
- Po Activity (~~range~~ ~~cahar~~) storage
- 3rd parties
  - storage
  - gateway
- Node Certificate?
